DETAILED ACTION

It is noted that claims 16-26 and 28-30 have been canceled, claims 31-47 have been amended.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-12, and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Borgwardt et al. (US 5,949,490) as set forth in the previous Office Action, Paper No. 7.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 2613

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Borgwardt et al. (US 5,949,490) in view of Ben-Arie et al. (US 5,946,039) as set forth in the previous Office Action, Paper No. 7.

Response to Arguments

5. Applicant's arguments filed 05/03/04 have been fully considered but they are not persuasive.

The applicant argued that Borgward does not encoding the first slice of each panel with the target quantization level and driving quantization level used to encode the last slice of each of the image panels toward the target quantization level used to encode the first slice of each panel, pages 13-15 of the remarks.

The examiner respectfully disagrees with the applicant. It is submitted that Borgward discloses each processor (encoder) encodes each macroblock in the current slice based upon the target rate and quantizer scale factors as considered encoding the first slice of each panel with the target quantization level (col. 4, lines 19-29) and the step a master control for controlling (driving) the quantizer scale factors for each slice (last slice as well) to be encoded by the client processor (col. 4, lines 9-14) and updating quantizer scale factors for the next set of slices that includes the last slice to encoded by the client processors (encoders) as considered driving quantization level used to encode the last slice of each of the image panels toward the target quantization level used to encode the first slice of each panel (col. 4, lines 29-37). Therefore, Borgward anticipates the claimed features.

The applicant further argued that Borgwardt does not disclose the adjustment of a GOP target bit rate based on number of film or non-film pictures.

The examiner respectfully disagrees with the applicant. It is submitted that Borgwardt discloses alter target $R(n)$ and compute $Q(n)$ for MPEG or JPEG pictures that means the adjustment of a GOP target bit rate on number of film (MPEG) and non-film (JPEG) (fig. 4). Therefore, Borgwardt anticipates the claimed features.

It is noted that the arguments on pages 12, the Petterson reference, are moot, therefore, the rejection is withdrawn.

Allowable Subject Matter

6. Claims 31-47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2613

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
